

ACUMEDIC **PHYTOFORM** SYSTEM

GMP quality, purity tested herbs

www.phytoform.eu

OVER 250 COLOUR CODED HERB COMPONENTS

TURNKEY SOLUTION FOR CLINICAL PRACTICE

The PHYTOFORM SYSTEM is a new concept in modern Chinese herbal prescriptions for the discerning practitioner. It provides a complete, ready-to-use system for simple and convenient dispensing of even the most complex formulations.

-  Highest grade GMP herbal extracts
-  Completely customisable prescriptions
-  Simple and convenient dispensing system
-  Comprehensive resource of herbs and formulations
-  Own clinic branding for enhanced brand image
-  Modern and user friendly interface
-  Convenient stock control system and reordering
-  A legal route to prescribe herbs to patients

NOT ALL EXTRACTS ARE THE SAME

The reputation of a clinic is judged by results. The efficacy of a prescription is dependent on high potency extracts. Unfortunately there are many poor quality herbal extracts on the market providing cheap but dilute extracts. Extract potency is not only affected by how much raw herb is used but more importantly by the quality of those starting herbs.

Potent, dissolvable herbal granules that are easy to dispense, dissolve and drink

Made from raw herbs grown in their perfect environment and harvested at the peak of their efficacy

Extracted to our exacting specifications expert GMP registered extractors

Water (not solvent) extracted for genuine traditional herbal composition and effect

Purity tested for guaranteed unadulterated extracts

Sealed, stored and shipped immediately and in perfect conditions to ensure herb stability

POWERFUL PRESCRIPTION INTERFACE

A powerful prescription interface allows practitioners to quickly choose formulations and individualise prescriptions effortlessly to their patients needs. The whole prescription process is seamlessly linked with stock levels.

-  Innovative interface accessible from computer, tablet or smartphone
-  Completely customisable prescriptions for ultimate practitioner flexibility
-  Store and favourite commonly used formulations for ease of prescribing
-  Live stock figures allow prescriptions to be altered according to stock levels
-  Own clinic branding on all prescriptions
-  Prescription history for reference and ease of repeat prescriptions

STRESS FREE DISPENSING

Dispensing herbal extracts can be daunting and is prone to error. The PHYTOFORM dispensing system is designed for simplicity and cleanliness with standardized measuring scoops and a clear display showing exactly how to fulfil a prescription.

Innovative dispensing interface accessible from computer, tablet or smartphone

Clean and hygienic dispensing system with all apparatus provided

Quick and accurate dispensing for even the most complex formulations

Only a small dispensing area needed

A fraction of the cost of expensive and space consuming dispensing machines and without any maintenance costs and downtime

So easy that anyone can be trained in dispensing

COMPREHENSIVE RESOURCES AT YOUR FINGERTIPS

Even the most experienced practitioner refers to reference books in the course of prescribing. The PHYTOFORM SYSTEM has a comprehensive resource of over 250 herbs and base combinations seamlessly integrated into the prescription interface for ease of access and instant prescribing.

-  Clear and concise resources on all PHYTOFORM single herbs and base combinations
-  Includes all essential information for practitioners
-  An authoritative reference to show to patients
-  Written by eminent professors in Chinese Herbal Medicine
-  Approved by the CMIR as diploma learning material
-  Available free of charge to all PHYTOFORM clients on computer, tablet and smartphone
-  Available to purchase in print format

TAKE THE GUESSWORK OUT OF STOCK CONTROL

Clinicians should be spending their time treating patients and promoting their business and less time on administrative roles like stock control. The PHYTOFORM SYSTEM constantly monitors stock levels as they are being dispensed and will automatically alert clinics when a product is running low. The reordering system is simple and updates stock level on receipt.

System continuously monitors stock levels and provides a recommended order list

No requirement to purchase entire ranges of herbs but instead the clinic can build up stock with flexibility

Innovative base combination system allows practitioners to control expenses by not purchasing rarely used single herbs

Stock alerts to ensure that the dispensary is never out of stock

Send orders simply and easily directly from your computer, tablet or smartphone

AcuMedic Professional has over 3 decades of mail order experience with 90% of our orders dispatched same day

PHYTOFORM SUPPORT AND PRIVILEGES

AcuMedic recognises that practitioners are busy and expect highest quality support and convenience. All PHYTOFORM clients are given exclusive access to a wide range of resources and services.

ABOUT ACUMEDIC PROFESSIONAL

AcuMedic Professional has been supplying the professional Chinese Medicine industry for over 40 years. AcuMedic invented the disposable traditional acupuncture needle and has continued to innovate over the decades. The PHYTOFORM SYSTEM has been designed by AcuMedic Professional, AcuMedic Clinic (a world renowned clinical organisation) and teaching professors of the CMIR. The system has been created with an expert understanding of the specific needs of the Chinese Medicine professional from single practitioners to multi-doctor clinics.
